## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Newman (6,626,925) in view of Davis (3,106,004) and Shackelford et al. (6,254,621).  
Newman shows a blade with a handle and a sheath. The sheath has a spring mounted lock that engages a groove and two recesses. Newman fails to show the claimed button and a dead lock recess with a hindering mechanism. Shackelford suggests the use of a dead lock position for such knives. Davis shows a catch or lock block motivated by a separate button. Obviously one of ordinary skill in the art would add such an actuator button with a mount to the sheath of Newman to actuate the latch separately and then provide a hindering mechanism such as a wedge or stop to block the activation thereof by the button.

### ***Allowable Subject Matter***

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
